1 Introduction

The most recent version of this document may be downloaded from https://github.com/aubreymoore/Tinian-cycad-images/raw/main/report/tinian_cycad_images.pdf.

Figure 1: This image of *Cycas micronesica* leaflets infested with CAS was taken by Ken Puliafico on Mount Lasu, Tinian on July 25 2021. It is remarkable because large numbers of scale crawlers are clearly visible.
